

## Technology Innovation

The right technology is everything. Your people can perform at their fullest potential and better serve your customers. The right technology helps create a culture that thrives on continuous improvement.

Leading the way in an  
innovative world.

## Technology is the backbone of our business.

We've worked with hundreds of companies across a multitude of industries, and we bring this larger perspective to our clients. We don't have a one size fits all mentality. We design technology organizations that align with and support a company's overall business vision, strategy and goals. We don't just work with you, we collaborate with your employees to create change that's sustainable. When they're bought in, you're successful. **It's that simple.**

## We've got a knack for change.

It's more than the technology, it's about the people and no one values this more than the team at UHY Consulting. So, while we're implementing technologies that improve processes, automate workflows and increase productivity, we're also helping to shape your organization's culture.

We build collaborative, insightful relationships during our engagements that modernize processes and workloads.

- Blackline
- Planful
- Boomi
- Redwood

## Our Technology Innovation Services

Technology is the continuous process improvements that build upon the previous foundation of earlier work. Having a solid plan and knowing how to successfully execute on that plan is paramount. We can steer you through the maze of current and future technologies while building on your legacy systems, ensuring optimal performance can occur now and in the future.

When we're able to fully evaluate the true state of technology operations, innovation possibilities become clear, paving the way for future investment.

### Technology Sourcing

Our sourcing process allows you to be fully certain of your technology selection. We identify and implement optimum technology solutions and our tech-agnostic approach and implementation framework ensures success.

### Digital Transformation

It's important to understand the health of your technology prior to starting your journey to IT modernization. We identify gaps within your technology organization and provide a fresh perspective with clear, actionable next steps.

### Technology Automation

We identify areas in your organization that could benefit from automation and we leverage technology to modernize these processes, creating efficiencies and allowing you to focus on more value-added activities.

### Digital Strategy

Bringing together your IT and business leaders, we create a technology vision that is aligned with the business. Our goal is to build technology organizations that deliver efficiencies and increase value-added opportunities.

### AI & Machine Learning

To ensure your organization is always future-ready, we design strategies to implement artificial intelligence (AI) and machine learning that allow you to fully capitalize on your most valuable assets.

UHY Consulting is a management consulting firm that inspires clients to imagine and realize a company with unlimited potential, leaving lasting results that strengthen an organization and its people. The firm provides a broad range of capabilities, including Business and Strategy, Organization and Operations, Finance and Accounting, Technology Innovation and Cybersecurity and Privacy. UHY Consulting is an affiliate of UHY International, a top 20 global accounting network, and UHY LLP, a national Certified Public Accounting firm.

When you meet us, you'll immediately feel the passion and care that we have for each other, our clients and our work. We'd like to bring this to your organization.

**Let's have a  
conversation!**
